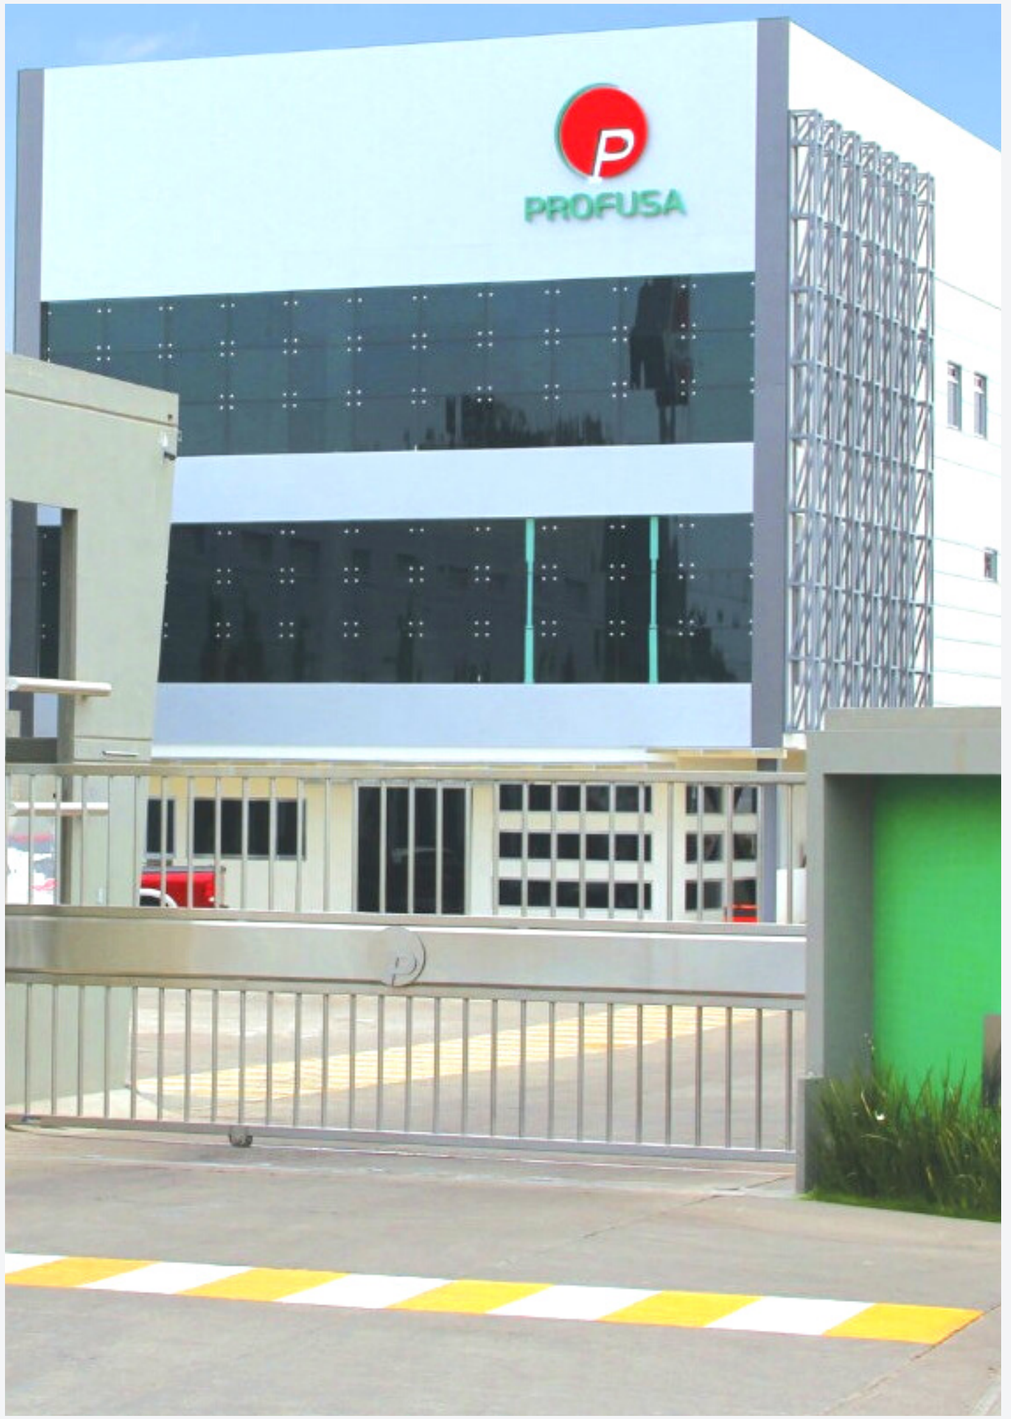
CONTINGENCY PLAN COVID 2019

-"If you let the disease overcome you, there will be no medication that will cure you".



PROFUSA

Following the Recommendations.

SALUD
SECRETARÍA DE SALUD

World Health Organization

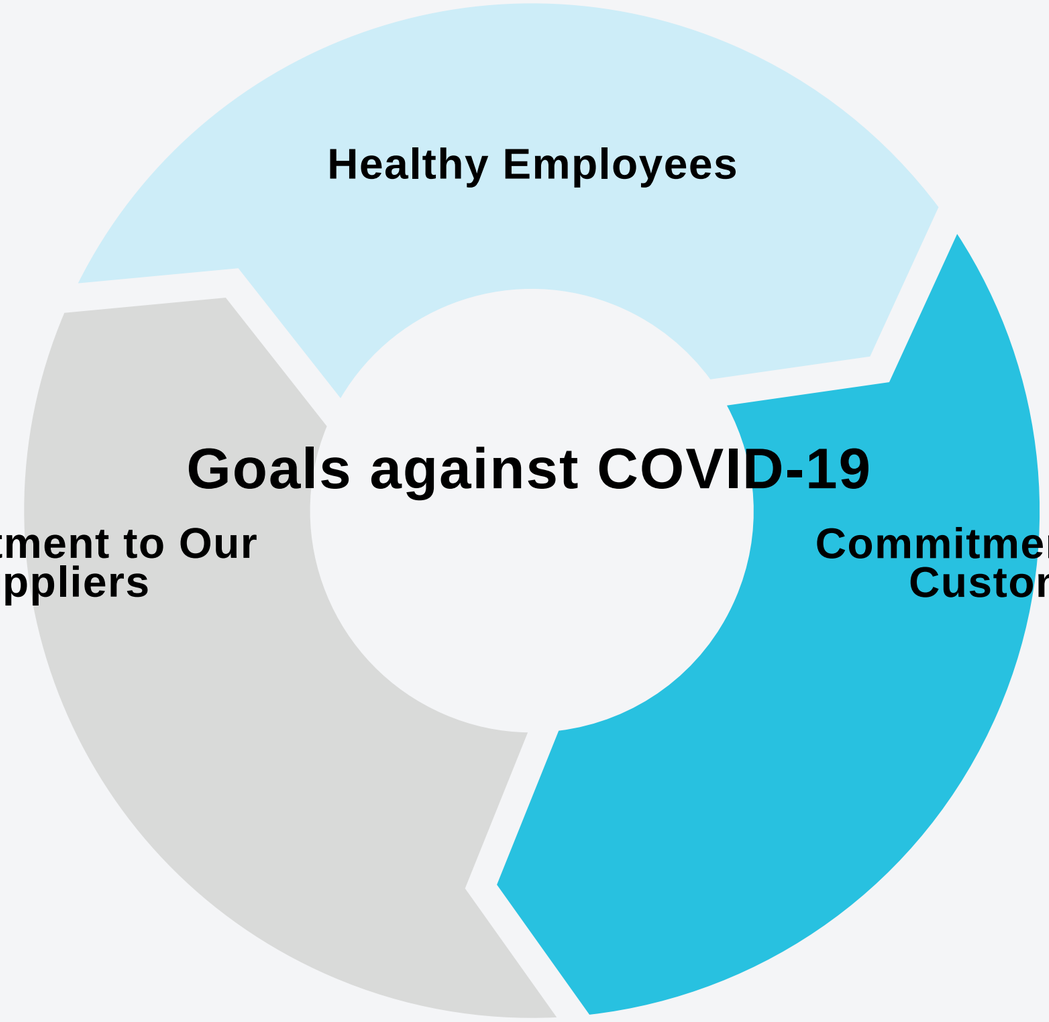
Following the recommendations of the Secretary of Health and Human Services, Food Drug Administration, the Pan American Health Organization and the World Health Organization, we have prepared contingency action plans for the COVID 19.

FDA U.S. FOOD & DRUG ADMINISTRATION

Pan American Health Organization

Institutional Commitment

This is an extraordinary situation we are going through all over the world, however, we are working closely with our suppliers to guarantee our production chain, from the purchasing area to the logistics area.



The goal of our Institution is to keep our employees healthy, we know that it is a difficult situation at a global level, but we are doing our best to keep ourselves healthy and without economically affected.

We are modifying procedures, work schedules, our logistics to deliver our product to our customers on time and with the best quality that has always distinguished Alimentos Profusa.

Taking Care of Our Employees

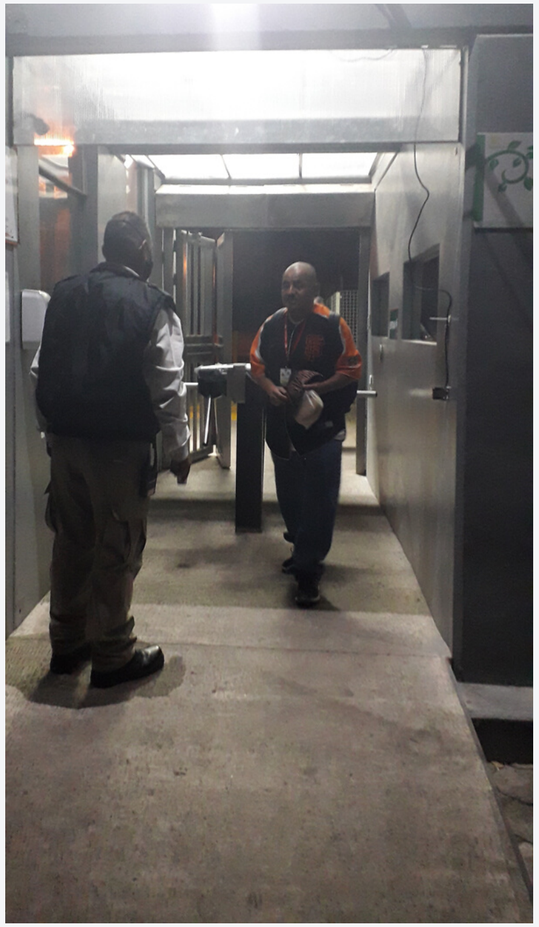
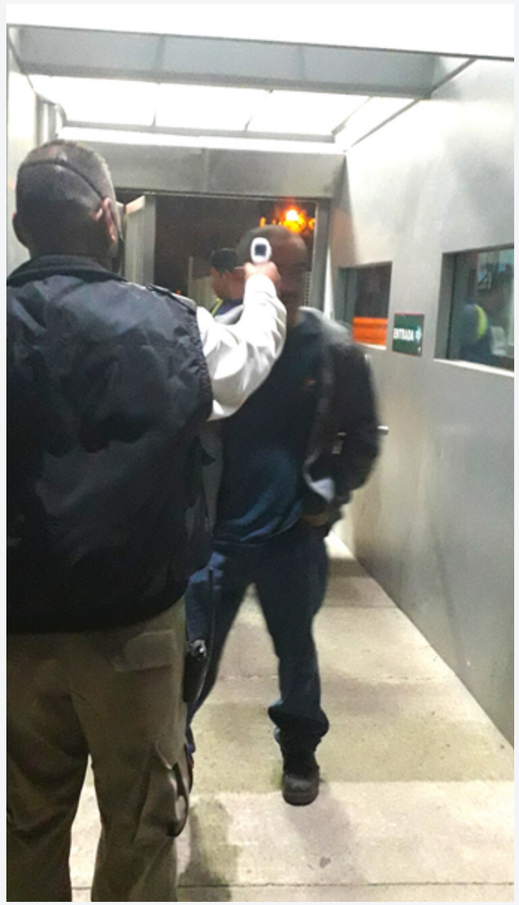
4.- Personal Care.



DISINFECTANT LIQUID SPRAY AT THE ENTRANCE AND EXIT.

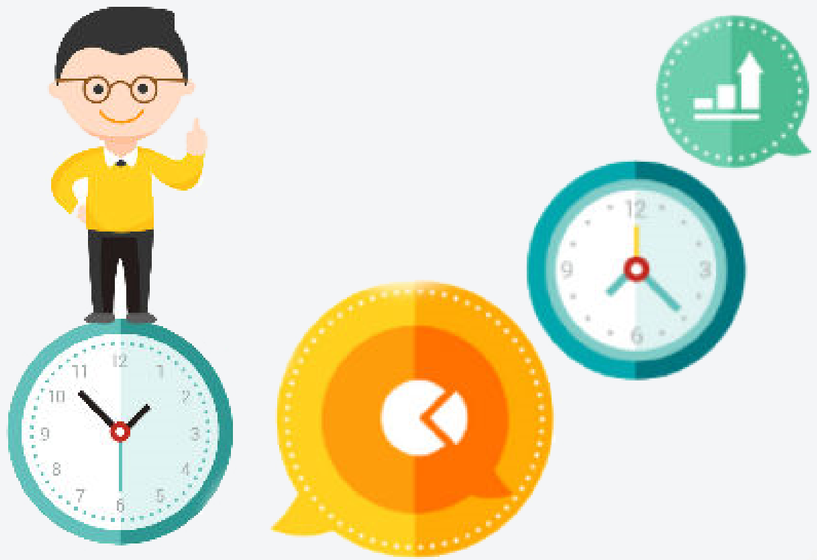
USE OF ANTIBACTERIAL GEL.



TAKE PERSONNEL'S TEMPERATURE AT FACILITIES' ENTRANCE AND EXIT

Taking Care of Our Employees

5.-Rotation of working hours and working from home.



Changes are made in our personnel working hours, to reduce contact and/or agglomeration of personnel in specific areas of the company.

The technology of our organization is at the service of our personnel so that they can carry out their daily activities from home, if their nature allows it. This reduces the possibility of contagion of COVID-19. In addition to being able to spend more time with the family, thus reducing the stress that the contingency situation can generate.

Intensive Care of Plant, Raw Material and Finished Product

Sanitization.

All our facilities are properly sanitized, as established by the general standards described in our protocols and the certification protocols we have acquired.
However, the time between one sanitization process and another has been accelerated, with the aim of reducing the possibility of contagion of COVID-19.
In addition to the fact that all our personnel continue to comply 100% with the safety requirements defined in our food safety plans.

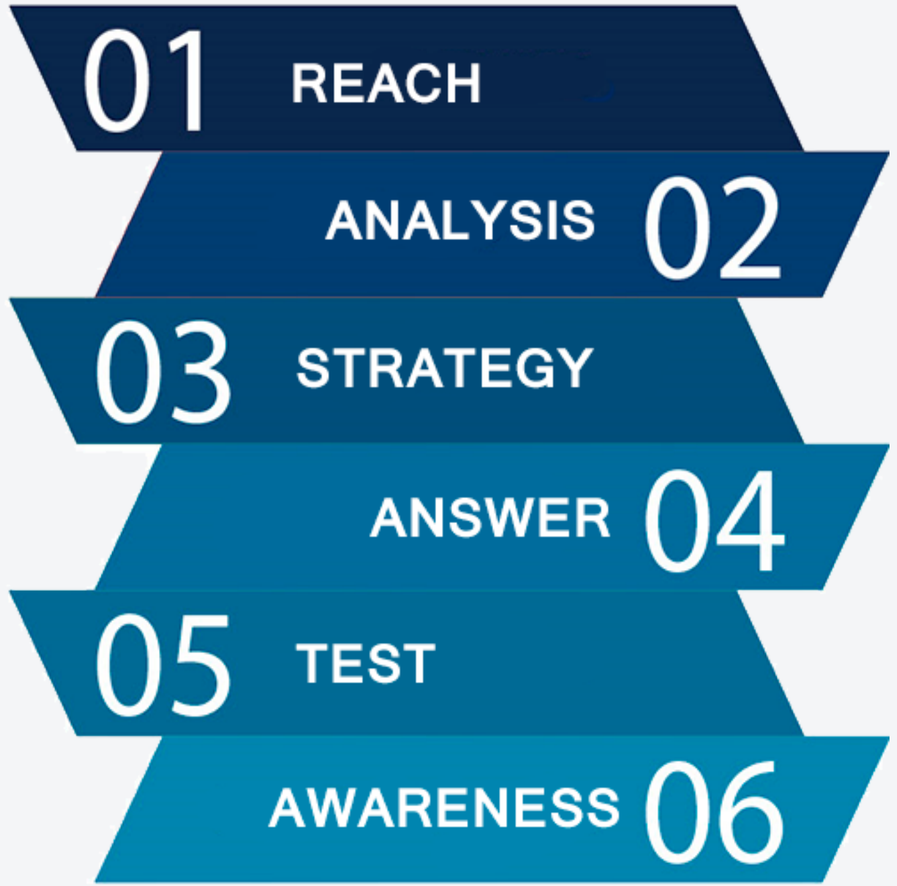
Updated Contingency Plans

Our Contingency Protocols have been updated in all the functional areas of the institution, to define promptly the actions of all our personnel in exceptional circunstances during this contingency period.

Measures to protect the finished product	
RISKS	MEASURES
Storage	The plant has warehouses for finished products with a refrigeration and freezing system.
	No problem is foreseen for finished products, since during its process the product is manufactured with the highest standards of quality and safety standards.
Equipment failure	Alternate storage areas are identified in case our warehouses fail.

Measures to foresee in case of border closures	
RISKS	MEASURES
Unable to deliver the product to our customers	Maintain constant communication with our customs agents so that we are informed on a daily basis about the measures implemented by the governments of Mexico, the United States, Canada, and other countries.
	Maintain constant communication with customers to follow up on compliance with agreed product delivery schedules
	Maintain up-to-date information on trade policies and whether there are any indications for border closures.

Measures to assist product transports	
RISKS	MEASURES
Not having transportation available to comply with the delivery schedule to our customers	Implement the sanitation of transport cabins
	Placing signs in transport with COVID-19 prevention measures
	Train and make transport staff aware of preventive measures.
	Maintain transport review and verification protocols according to customs requirements.



PROFUSA
